1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Kap on 11/(2, 4 & 7)/2005.

In the claims:

In claim 27, line 4, after "material" insert --with the light--;
and replace "it" with --the target material--.

In claim 37, line 1, change "36" to --27--.

2. The following is an examiner's statement of reasons for allowance: the update of the prior art found no prior art references using IR light resonant with a vibrational mode of the target starting material to cause vaporization thereof and deposit the vaporized material without decomposing it, and thus produce essentially the same chemical deposit as the target material. Art of interest includes the Haglund, Jr. et al references, which select resident vibrational mode of at least one component of a target material to use localized laser energy to produce bond breaking, desorption and ionization but for mass spectrometry, not deposition as claim. Branagan et al., which is not prior art, discusses pulsed laser deposition of target material, where the deposited layer can be identical to the composition of the source composition, but need not be and does not require the use of IR lasers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
